Pothuhera, Kurunegala

### EXPERIENCE

#### Software Engineer (2025–Present)

Emmanuel's Lanka | Hettigama, Ja-Ela

- Driving automation and efficiency at a leading IT and IoT solutions company. Built a Task Tracker system, implemented CI/CD to cut deployment time by 80 percent, and led a team of three developers while mentoring juniors.

#### Associate Software Engineer 2024-2025

Emmanuels Lanka | Hettigama, Ja ela

- Contributed to the ELIoT and RFID Portals, developed analytics dashboards, and led multiple AWS-hosted projects while managing added responsibilities after the Senior Engineer's departure.

#### Software Engineering Intern 2024

CeylInfo Solutions | No.124/4, Maveedalupotha, Kurunegala

- Completed a short-term internship where I strengthened my skills in JavaScript, TypeScript, PostgreSQL, and Next.js. Worked on real-world projects that helped me understand full-stack development and modern web application workflows.

### PROJECTS

#### Task Tracker

- A web-based system designed to monitor developer performance, track progress, and improve team efficiency through real-time task management and analytics.

#### Online Exam Applying System

- A React-based platform that allows students to apply for exams, manage submissions, and view application status through a simple and responsive interface.

#### POS System

- A C# based POS system designed for efficient inventory management and real-time sales tracking.
