SKILLS

LANGUAGES

- Javascript
- Typescript
- Kotlin
- Java
- C#

FRAMEWORKS

- NextJs
- MERN Stack
- React Native

TOOLS

- Prisma , Neon
- AWS, Vercel, VPS
- Node-RED
- Postman
- VS Code , Antigravity
- Beekeeper Studio

CERTIFICATIONS

- Kanz AI Hackathon Competency - 2026
- MySQL Bootcamp Certification -2025

ADIL SAALY

SOFTWARE ENGINEER

EDUCATION

Bachelor of Information Technology (BIT)
University of Moratuwa
2026–Present
IN PROGRESS

Higher National Diploma in IT
SLIATE - ATI Kurunegala
2022-2025
GPA: 3.86

G.C.E. Advanced level - Commerce
Ku/Dutugemnunu Central Collage
2021
3 C

WORK EXPERIENCE

Software engineer - Emmanuels Lanka

2025-Present

- Technical Leadership: Led a 3-developer team as Scrum Master to deliver enterprise software and IoT projects.
- Full-Stack & IoT: Developed garment factory RFID systems, real-time SCADA WebSockets dashboards (PAP, CEB), and React Native/Kotlin mobile apps.
- DevOps: Optimized deployment pipelines with GitHub Actions and migrated infrastructure from AWS to local servers, reducing deployment time by 80%.

Associate Software Engineer - Emmanuel's Lanka

2024-2025

- Contributed to ELIoT and RFID Portals while managing multiple cloud-hosted deployments.
- Developed analytics dashboards using Recharts for garment manufacturing WIP tracking.
- Handled AWS and CI/CD pipelines

Software Engineer Intern - CeyInfo Solutions

2024

- Strengthened core skills in JavaScript, TypeScript, PostgreSQL, and Next.js through full-stack web application development.

PROJECTS

- **Secure Proxy Tunnel -** Deployed and managed a secure Xray proxy tunnel using a 3X-UI panel on a Linux VPS, configuring custom ports, client routing, and SSL certificates.
- **ELIoT SmartFlow -** Garment cutting software to optimize the process of layering and cutting to reduce wastage and prints QRs for bundles
- **ELIoT Handheld RFID -** Custom built application made for N72sh Device with React native and vendor SDK. Used in garment factories to track garments with RFID tags.
- **VantageAi-** Real-time monitoring dashboards and data pipelines for large-scale solar plant infrastructure.
- **ELIoT Portals**: ELIoT administrative portals for industrial IoT physical terminals.
- **Task Tracker**: Web-based system for monitoring developer performance through real-time analytics.
- **Online Exam Applying System:** React-based platform managing student exam submissions and application statuses.
